WORK EXPERIENCE

Senior Economist – Labour Market Evidence, Government of Alberta

May 2025 - Present

- Built and automated labour market data pipelines using Statistics Canada and Vicinity Jobs APIs with Python and SQL, reducing manual data processing by over 30% and improving consistency of analytical inputs
- Produce four recurring labour market publications integrating data from Statistics Canada, Haver Analytics, Signal 49, and provincial administrative sources, transforming labour market datasets into structured analysis for internal policy teams and external stakeholders
 - [Alberta Labour Market Highlights](#) (monthly, public): Analyze Labour Force Survey releases across 10 economic indicators including employment, unemployment, participation, wages, hours, and sectoral and regional trends; distributed to over 600 subscribers
 - [Skills in Demand](#) (quarterly, public): Analyze employer job postings to identify shifts in skills requirements, education levels, and occupational demand across industries; distributed to over 400 stakeholders
 - [Alberta Industry Profiles](#) (annual, public): Produce labour market profiles for ten industries, synthesizing employment, wages, demographics, and outlook indicators; distributed to over 200 external subscribers
 - [Small Area Estimates](#) (monthly, external): Produce monthly unemployment and employment estimates across Alberta's sub-regions, highlighting regional variation in labour market conditions; circulated to over 500 internal stakeholders
 - Hiring Demand Bulletin (monthly, internal): Monitor hiring activity across seven regions and five occupational groups, identifying areas of labour market acceleration or softening; circulated to over 100 internal stakeholders
- Convene quarterly roundtables with labour economists from industry and academia to discuss labour market developments; synthesize insights and circulate summaries internally to inform analysis and publications
- Authored an internal policy report synthesizing findings from a province-wide survey and focus groups on barriers faced by unemployed Albertans. Segmented results across youth, immigrants, long-term unemployed, and rural workers, translating findings into policy considerations now used by five ministries, including Advanced Education, to adjust training and employment programs

Senior Economist – Economic Modelling and Analysis, Government of Alberta

May 2024 – May 2025

- Developed a household-level microsimulation model to estimate fiscal costs and household savings under Alberta's \$10-a-day child-care agreement, producing distributional impacts by income, family type, and region to support program design and policy briefings
- Conducted scenario and stress testing to assess downside risks to GDP, investment, and sector output under potential U.S. tariff shocks, summarizing sensitivities and transmission channels in executive briefings
- Produced quantitative impact assessments of federal-provincial funding frameworks, translating policy parameters into fiscal models to estimate multi-year budget impacts, cost drivers, and implementation risks
- Built an automated macroeconomic data framework using the Oxford Economics API, integrating over 200 macro variables and developing Haver-based Excel templates used by policy analysts
- Produced monthly economic briefings for senior leadership on major economic releases and central bank decisions (CPI, GDP by Industry, Bank of Canada and Federal Reserve announcements), translating results into implications for inflation, growth, and sector performance
- Delivered literature reviews of major macroeconomic research papers, summarizing methodologies, empirical findings, and policy implications to inform modelling assumptions and strategic discussions

Associate, Personal Banking, TD Canada Trust

May 2021 – May 2022

- Evaluated credit and operational risk on personal banking files in collaboration with adjudication teams, ensuring documentation met internal compliance and regulatory standards
- Managed end-to-end estate settlement processes for deceased customers, coordinating across clients, legal counsel, and estate adjudicators to resolve cases accurately and within regulatory requirements
- Supervised over 10 front-line staff and branch tellers on a rotational basis, authorizing cheque transactions while enforcing risk and operational procedures

EDUCATION

McMaster University, Hamilton ON

August 2023

MA in Economics

Focus: Financial Economics, Applied Econometrics Monetary Economics, Macroeconomic Analysis

Western University, London, ON

April 2021

BA in Economics and Applied Mathematics – Double Major

Focus: Mathematical Economics, Game Theory, Financial Economics, Numerical Analysis

SKILLS AND INTERESTS

Technical: Python (Pandas, NumPy), SQL, Excel (advanced), PowerPoint, Tableau, Bloomberg, Haver Analytics, Oxford Economics

Analytical: Econometric Modelling, Microsimulation, Scenario & Stress Testing, Labour Market Analysis, Fiscal Impact Assessment

Communication & Languages: Policy Writing, Executive Briefings, Stakeholder Reporting | Hindi, Punjabi, and Urdu (business proficiency)
